

**The right technology with
the right support, makes all
the difference.**

Get the stability of Real Server Technology Solutions from **The Go2IT Group** - your complete **IT Solutions Provider**.

In business, growth is good. Ensuring that your technology and infrastructure keep up with growth is even better. Finding the right servers to meet your needs today and tomorrow can be the key to sustaining that growth. More than equipment, servers are the foundation of a dependable IT infrastructure.

Intel® Xeon® processor based servers offer a range of solutions designed to meet the needs of your business. With Intel, you have the benefit of proven reliability, the operational advantages of using server technology developed specifically for small and medium businesses and the confidence that comes from working with a market leader.

A real server delivers real advantages — from keeping your systems up and running 24/7 with redundant power capabilities to the improved data protection of built-in error checking. And with the added benefit of remote server management, you can confidently grow your business using the flexibility of outsourced IT management solutions from The Go2IT Group. With Server Solutions built on the latest Intel® Xeon® processors, you have a solid foundation for the future.
